You’ll notice the difference as soon as you walk into a Tracer. The combination of timeless-classic designs with modern touches and an abundance of technology make Tracer one of kind. Every room is designed with you in mind — from the kitchen with solid surface countertops and a low profile range hood, to the bathroom with a skylight in the shower, and the master bedrooms that feature residential sized beds.
UVW (Unloaded Vehicle Weight) is the typical weight of the unit as manufactured at the factory. It includes all weight at the unit’s axle(s) and tongue or pin and LP Gas. The UVW does not include cargo, fresh potable water, additional optional equipment or dealer installed accessories. Estimated Average based on standard build optional equipment.

CCC (Cargo Carrying Capacity) is the amount of weight available for fresh potable water, cargo, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC should accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity. Estimated average based on standard build optional equipment.

A RENEWED COMMITMENT TO QUALITY.

When it comes to choosing an RV, customers demand quality. At Prime Time Manufacturing, we have renewed our commitment to product quality and customer satisfaction with our new Customer Assurance Inspection (CAI) process.

Before any RV can be cleared to leave our site, it must first pass a newly-developed, rigorous 125-point checklist. Our skilled technicians review every model from top to bottom, both inside and out. We check and double-check the entire unit, from water tanks to the electrical system, roof to underbelly, kitchen appliances and countertops—and everything in-between.

When you choose a Prime Time Manufacturing product, you can be assured that our enhanced commitment to quality has been developed with you in mind. Choose quality. Choose Prime Time Manufacturing.
